ADD VALUE

ON THE RAIL

Letter to 44 Farms, April 8, 2010:

"We just finished the closeout on the pen of steers fed at Graham Land & Cattle Co. The cattle did extremely good... The feeding data backs this up: average daily gain was 3.29#s with a dry matter conversion of 5.77. Cattle weighed 777 and were harvested 163 days later at 1316 with a total cost of gain of \$.75. The quality grades are impressive also with 3 prime, 20 choice,

and 1 select. Yield grades were 16 Y2s, 6 Y3s, and 2 Y4s. No mortality and a couple treated for BRD. After it's said and done these cattle have done everything we asked them to do at Graham, the management inputs and the genetics from the ranch end (44 Farms) have closed the deal from a quality point of view and the results are quite impressive."

—Jay Gray, Graham Land & Cattle Co., Gonzales, TX
